

CONCRETE CONSOLIDATION

EX-STOCK DELIVERY

1 YEAR WARRANTY

INTERNAL VIBRATORS

VH

Electric high frequency internal vibrators

Electric vibrators for concrete consolidation characterised by high performances, consistent speed and remarkable resistance to abrasion.

VHPG

Internal high frequency vibrators with pistol grip

For thin layers of concrete, such as floors or slabs, where a short, light and manoeuvrable vibrator is needed. For all these cases, the ideal solution is to use a pistol grip poker.

EXTERNAL VIBRATORS

ELECTRIC VIBRATORS

High frequency electric vibrators for concrete compaction both at construction site and precast factories.

FASTENING SYSTEMS

Brackets for quick mounting of vibrators on wooden or steel formworks.

EWO

High frequency internal vibrators with built-in converter

Equipped with compact electronic frequency converter applied to the supply cable directly. Suitable for the connection to a single phase main power socket.

VHA

High frequency pneumatic immersion vibrators

Ease-of-use and maintenance-free make the VHA the perfect solution for compacting concrete when electricity is not available.

PNEUMATIC VIBRATORS

Pneumatic vibrators for formworks and moulds.

CONTROL PANEL

Designed for precast plants and construction sites. Possibility to power the vibrators one by one, in groups or all together and to supply the vibrators with remote control.

CM

Frequency and voltage converters

Frequency and voltage converters equipped with permanent magnets, specifically designed to power high frequency concrete vibrators continuously.
